

Retool your expectations on handhelds with Agilent Handheld DMMs and get cash back!

For more than 70 years, Agilent has been creating innovative measurement solutions. In the recent years, we've been applying our tradition of innovation to handheld test tools for electrical and electronics testing. Today, our handheld test tools are ready for the conditions you face every day - and many offer unique functions such as:

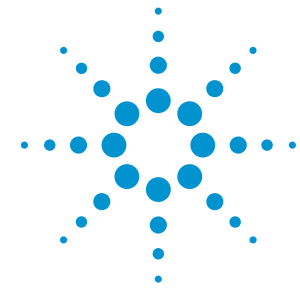

- Clear readouts from a high-contrast OLED display
- Continuity checks with audible and flashing alerts
- Low-light testing with a built-in flashlight
- Accurate ground-resistance measurements that minimize false readings

For a limited time, purchase a selected Agilent Handheld Digital Multimeter between **August 1, 2011** and **January 31, 2012** and get up to \$100 cash rebate (refer to the list on the right for more info).

Next, fill out an online form at www.agilent.com/find/hhrebate and we will ship the check to you!

Agilent HH DMM models	Cash rebate
U1231A, U1232A, U1233A	\$ 30
U1241B, U1242B	\$ 60
U1251B, U1252B, U1253B, U1271A, U1272A	\$100

** Offer valid from August 1, 2011 to January 31, 2012. One rebate check per HH DMM serial number redeemed. Offer available only in the United States and Canada. You can purchase your new HH DMM unit from a distributor or from Agilent, but only end users are eligible to receive the cash rebate. Distributors are expressly excluded from receiving cash rebates under this offer.*
