

PROTECTING YOUR ADVANTAGE

Hoffman[®]

A PENTAIR COMPANY

CONDENSATION KILLS ELECTRONICS.

H₂OMIT™

Condensation  Solution System

Thermoelectric dehumidifier and vent drain system for complete condensation protection.

PREVENT CONDENSATION AND REMOVE STANDING WATER IN YOUR ENCLOSURE. PROTECT YOUR ELECTRONICS.

Avoid costly equipment damage with a complete condensation prevention solution. Consider Hoffman's new condensation management solution—H2OMIT™ Thermoelectric Dehumidifier and UL-certified Vent Drain—if your electronic or electrical enclosures are regularly exposed to environmental temperature extremes, high-pressure sanitary washdowns, or your controls and electrical components are at risk for corrosion.

An economic solution to protect your investment. Only Hoffman's H2OMIT pairs a thermoelectric dehumidifier with an innovative one-way vent drain that continuously removes moisture from the air, equalizes enclosure pressure and allows accumulated moisture to exit by the force of gravity while preventing contaminant entry with a mechanical shut-off. The combination of these two high-performance components delivers a complete and cost-effective solution that can be utilized in both indoor and outdoor applications.

- **Remove** moisture from the air inside an enclosure
- **Expel** collected moisture and prevent contaminant entry
- **Eliminate Condensation** that shortens component life and causes faults
- **Equalize Pressure** within the enclosure, eliminating pressure-induced vacuums
- **Worldwide 24-volt DC** low voltage operation for use in global applications
- **Maintain UL** enclosure rating; repel washdown and contaminants

A PENTAIR COMPANY

The total solution: Hoffman's vent drain to remove moisture combined with an optional thermoelectric dehumidifier for enhanced protection.

The H₂OMIT Condensation Solution System maintains the enclosure rating while offering effective, simple and cost-efficient protection for your critical components. The system installs in new or retrofit applications, in mild steel, aluminum, stainless steel and non-metallic enclosures. Features include:

H₂OMIT Thermoelectric Dehumidifier:

- Easy DIN rail mounting above vent drain
- Compact design
- High impact ABS shell
- 24-volt DC operation for global use

H₂OMIT Vent Drain:

- One-way drain with mechanical shut-off
- Non-metallic or 304 stainless steel models
- Equalizes pressure in the enclosure
- UL-certified
- Installs in 7/8" hole with provided nut or 1/2" NPT/NPS threaded conduit hub
- Can be used without dehumidifier unit

Protect. Prolong. Perform. The H₂OMIT Condensation Solution System keeps your enclosed electrical and electronic components performing at peak efficiency, longer. Learn more. Contact your Hoffman distributor or visit hoffmanonline.com
