The HSST Series

Manual Control LED Tower

Comes as a complete kit for easy setup, with mounting and length options for many applications.

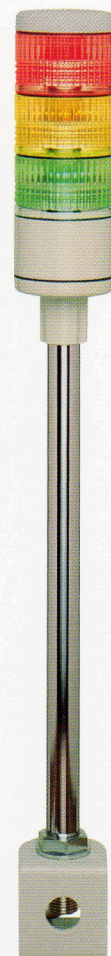

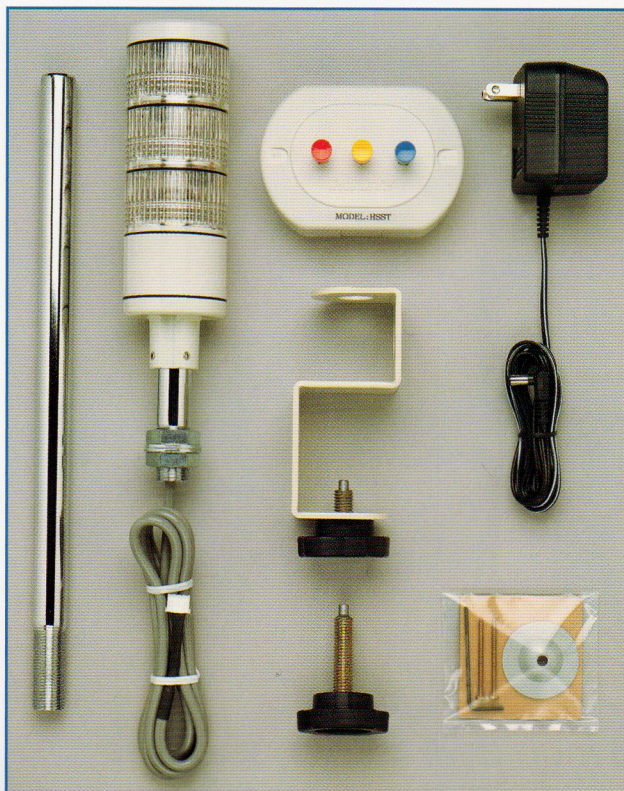

LED Type Light

AC120V

Mounted on office partition.

The HSST-312 kit, complete as shown below:

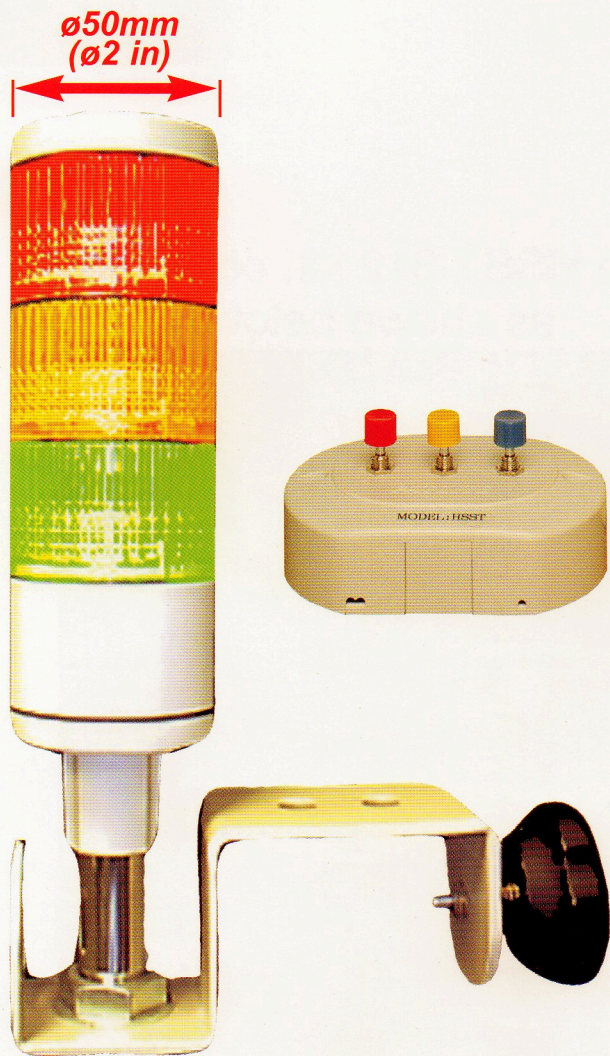

12 inch pole

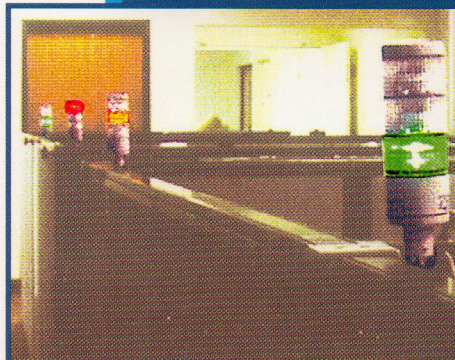

Application Examples:

- ◆ Assembly workstation process indicator.
- ◆ Office and warehouse employee status indicator light.
- ◆ Cashier and bank teller availability light.
- ◆ Any type of manually operated assembly shop.

The HSST series was designed to increase efficiency and productivity in the workplace by reducing down-time and improving operator/supervisor communication. The different colors can be used to indicate employee status in office, warehouse, factory or commercial environments. It has been used by sales offices where the red light indicates "not available", yellow is "supervisor needed" and green is "on call or on duty." The LED lights glow when switched on and appear clear while off, to visually blend in with any office interior. This is made possible by PATLITE's revolutionary patented LED technology. The kit allows the user easy installation onto office partitions, desks or tabletops.

3 inch pole with bracket
