# Boost Your Bench's Memory – For Free!

For a limited time, you can receive a FREE memory upgrade (up to \$600 USD value) with your purchase of select Keysight digital multimeters and function/waveform generators :

Keysight's 34465A/34470A Truevolt digital multimeters

Keysight's 33511B, 33512B, 33521B, 33522B, 33600A Trueform function/waveform generators

3 Simple Steps	What can you do with more memory?
1. Purchase any eligible digital multimeter or function/waveform generator.	<input checked="" type="checkbox"/> In digital multimeters, more memory allows you to do datalogging over a longer period of time and store many readings for later analysis.
2. Submit your <b>claim online</b> .	
3. Receive your free memory upgrade and BenchVue free trial.	<input checked="" type="checkbox"/> In function/waveform generators, more memory lets you generate complex waveforms with many points for higher time resolution.
